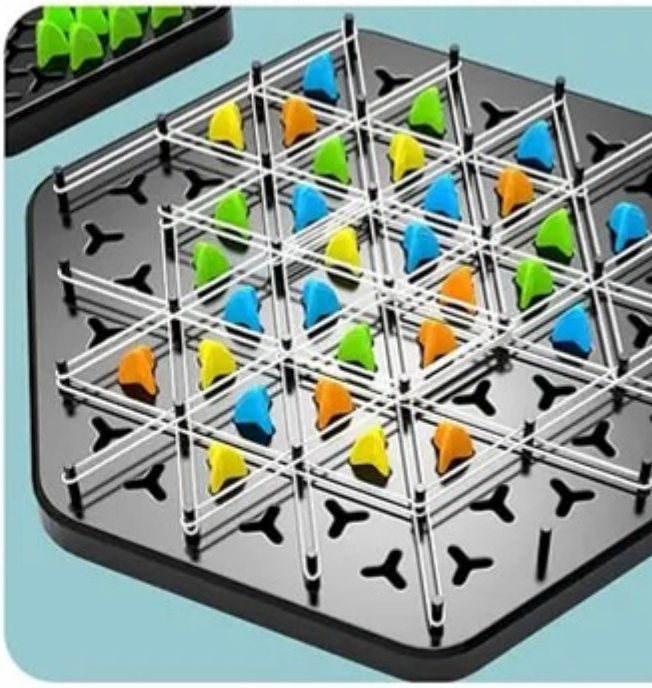
HOW TO PLAY

1.Each player chooses a color of chess piece and selects a starting player.

2.The first player stretches a rubber band into a strai line and loops it around the four pillars of the game b (without crossing over any holes on the board).

Default watermark

3.When a player forms a small triangle using the existing rubber bands on the game board, that player places their chess piece inside the hole to claim that triangle.



4. If multiple triangles are formed at once, the playe place multiple chess piecesAt the end of the game player who has placed the most chess pieces wins

3. When the player uses the existing rubber band on the chessboard to form a small triangle (the triangle formed by the rubber band around a hole on the chessboard), the player inserts one of his pieces into the hole to occupy the triangle. Multiple triangles can be formed and occupied in one stretch.
